

## Shell Red Bar 3.0

New Advanced Design for 2010

### Advantages / Pros

- First time ever in this industry, complete sealed units in rating IP 66
- Full impact-resistant acrylic construction
- No aluminum used, homogene thermal expansion now made possible
- Better, broader, more even yellow backlight illumination
- Equalizing inside/outside climate via GoreTex membrans to prevent condensation
- Upside down installation is possible
- Therefore easier, safe & correct installation
- Less power cable outlets through side entry
- Up to 5 years warranty possible
- 3 systems served on one power supply possible
- Therefore reduced installation time
- New, improved, HP, electronic & wide-input power supply included
- New, improved brackets for even easier installation
- Every standard system is a "MuPie"
- Every system is cutable from 2700 mm down to 1400mm
- New, advanced low power consumption LEDs used
- Less heat built up in the systems inside
- Result is a minimum 25% saving on the power consumption compared to versions 2.5 and 2.7
